Requirement

- Design and develop My Contacts page as showed in above picture
- User should able to add a new contact by click on Add button and right side form should allow to enter new contact details
- Validate all the fields when user clicks on Save button (all fields are *mandatory). Also take care of validating email and phone number format
- Saved contacts should be displayed on left side panel with edit or delete button and should able to edit/delete any contact

Instructions

- Use appropriate HTML 5 semantic tags and HTML 5 form elements
- Use clean separation of HTML, CSS and JS
- Use best practices and clean code
- **Good to have (not mandatory)**
 - Use HTML 5 Web Store API to save and retrieve form data
 - Use HTML 5 History API to update the URL when user performing action like new, edit and view

Code Submission

- Submit your code with GitHub. Create public github repo with your solution. [Read more](#) about creating
